Investing in America's Copper Future
to Meet Critical Metal Demand

Summer 2026 Investor Presentation

FORWARD LOOKING STATEMENTS

This presentation may contain forward-looking statements which involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance, or achievements to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements.

Forward looking statements may include statements regarding exploration results and budgets, resource estimates, work programs, strategic plans, market price of metals, or other statements that are not statements of fact.

Although the expectations reflected in such forward-looking statements are reasonable, there is no assurance that such expectations will prove to have been correct. Various factors that may affect future results include, but are not limited to: fluctuations in market prices of metals, foreign currency exchange fluctuations, risks relating to exploration, including resource estimation and costs and timing of commercial production, requirements for additional financing, political and regulatory risks. Accordingly, undue reliance should not be placed on forward looking statements.

All technical information contained within this presentation has been reviewed and approved for disclosure by Dan MacNeil, P.Geo, Domestic Metals' Qualified Person as designated by NI 43-101. Readers are further referred to the technical reports on the company's website and on SEDAR+ for more detailed information.

SMART CREEK HIGHLIGHT EVENTS

1. Rio Tinto historically drilled **109m @ 0.75% Cu (2022)** at the **Smart Creek Project, Montana**.
2. Rio selected DMCU porphyry specialists Dan MacNeil and Alan Wainwright to move project forward.
3. 2025 summer field sampling returned high grade results: **102 g/t Au with 23.1% Cu and 3,810 g/t Ag**.
4. Domestic Geos discovered surface porphyry = **4.26 g/t Au (high-grade for a porphyry at surface)**.
5. Our Geos are seeing the elements of a potential **Carbonate Replacement Deposit (CRD)**.
6. Peter Megaw – MAG founder & world authority on CRD's – **has joined as advisor**.
7. Geophysics (IP) completed with **multiple new large scale targets identified**.
8. Permitting in progress by USFS-for Sunrise Mine and Smart Creek PCD targets **which are drill ready**.
9. Drilling to commence in **Q3 2026**.

Major economic metal discoveries require **high grade and scale tonnes**:

- Ex: MAG Silver / Silvercrest / Great Bear / Filo
- Projects that start with high-grade and long intercepts **tend to remain with grade and scale**

DOMESTIC METALS INVESTMENT SUMMARY

1. Global copper supply & demand remains out of balance, US Government continues to **prioritize domestic base metals.**
2. Rio Tinto Option agreement: Smart Creek Copper Project in Montana – **Rio Tinto 40% / Domestic Metals 60%.**
3. The Butte Mine has produced **20% of all historical US Copper production (22Blbs):**
 - Located in Montana, a mining friendly jurisdiction high copper endowment state.
 - Both Butte and the Smart Creek feature the same geology, trend (Helena) and age (62ma).
4. Rio Tinto work presents Smart Creek on a **silver platter** – with previous drilling & technical work providing vectors.
5. Target – potential new **large Carbonate Replacement Deposit (CRD) and porphyry discovery.**
6. Management team has a history in adding **significant value to economic discoveries.**

COPPER MARKET OVERVIEW

Primary Copper Demand vs Mine Supply Potential

New discoveries are needed *now more than ever*.

Copper Price Overview

Energy Transition

- EVs
- Electrification
- Wind
- Solar
- Grid Storage
- Grid Augmentation

+

Digital

- Data Centres
- 5G
- Internet of Things
- Artificial Intelligence
- Blockchain

MONTANA: TOP TIER MINING JURISDICTION

Metal Endowment & Steady Production

- ~64 Mlbs of copper produced annually.
- 4% of U.S. copper production.
- Fraser Institute 2024: **ranked 6th** in terms of Investment Attractiveness in the United States.
- The Butte mining district has historical production of **22 Blbs of copper (20% of historical US Cu production)**.
- The Butte Mine and Smart Creek – **same trend, geological age and rock types**.

WHY DID RIO OPTION THE PROPERTY?

- Rio exploration budget is primarily allocated to its operating mines.
- Not all of Rio other global exploration projects can make the budget list.
- Rio management believes that Smart Creek project has potential, maintaining 40% stake as a result.
- Rio approached DMCU geologists who have worked with Rio in the past.
- DMCU geologists have porphyry copper expertise.
- Rio has dedicated a technical team to assist and follow project progress.

SMART CREEK: EXPLORATION & POTENTIAL

Large amount of quality exploration data can be leveraged towards **new discoveries**.

Best historical drill intercept: **109m @ 0.75% Cu.**

2025 surface sampling includes **102 g/t Au, 23.1% Cu & 3,810 g/t Ag.**

USBM, Exxon, Utah International, Noranda, Pegasus and Rio Tinto have explored the Project, **40 drill holes on property.**

Part of a trend of **underexplored** potential porphyry prospects & CRD deposits.

1800 – 1900 placer production, historical mining of porphyry related mantos deposits at Sunrise Mine including **12,500 Oz Au** and grades of **6.22 g/t Au, 31.1 g/t Ag, 1.5% Cu.**

These results indicate mineralization distal to a porphyry centre.

RIO TINTO HOLE SMCRO022 CROSS SECTION

- 109.75m @ 0.75% Copper, including 80.77m of 0.97% Cu & 16.76m of 2.25% Cu
- There is exploration potential for high-grade porphyry, exotic copper, carbonate-replacement/skarn Au-Cu, as well as structurally-controlled/epithermal Au mineralization.
- Analogous Mine: Bisbee, Arizona: **346.6 MT @ 0.656% Cu, 0.016 g/t Au, 0.45 g/t Ag.**
- Copper Queen CRD deposit (underground): **53 MT @ 6% Cu - total underground production.**

LARGE CU-ENDOWED EXPLORATION TARGETS

4 Key Tier 1 Target Zones including:

- 1 Smart Creek PCD:** Hypogene Copper Porphyry below Rio Tinto Drilling (drill ready)
 - 2 Sunrise Mine:** Au-Cu replacement mineralization (drill ready)
 - 3 Smart Creek Exotic:** Cu-Au porphyry at depth
 - 4 Radio Tower:** Emerging hypogene porphyry
- Large, intensely altered and mineralized footprints with up to 109.75m @ 0.75% Copper, 18.75 g/t Ag (SMCR 0022).
 - Year-round road accessible project, critical mass of high-quality exploration data for targeting.
 - Smart Creek and Sunrise are drill ready.

2025 FIELD SAMPLING PROGRAM

Highlight High-Grade Assay Results

- **102 g/t Au (G019007)**
- **74.7 g/t Au, 13.8% Cu, 3,810 g/t Ag (G019235)**
- **30.4 g/t Au (G019001)**
- **26.6 g/t Au (G019353)**
- **23.1% Cu, 424 g/t Ag (G019225)**
- **19.65% Cu, 458 g/t Ag (G019031)**
- **19.05% Cu, 582 g/t Ag (G019038)**

"The 2025 field campaign was a success. **These are the highest-grade field samples results I have ever been presented with in my career.** In my experience these kinds of returns are harbingers of major economic discoveries. High grade mineralization has been identified in several locations, including new discovery areas. We look forward to firming up drill targets, deploying a targeted geophysics program followed by a diamond drill program in Q1, 2026"

- Gordon Neal, CEO

2025 FIELD SAMPLING PROGRAM

NEW GOLD MINERALIZATION DISCOVERED: SUNRISE MINE (EXPOSED PORPHYRY DIKE)

Dr. Peter Megaw at Porphyry Dike (June 2026)

2026 DMCU GEOPHYSICAL RESULTS

2026 IP RESULTS: SMART CREEK & SMART CREEK EXOTIC

IP LINE LOCATIONS

Line 5 looking northwest, the anomaly extends from 1,600m to below 1,200m elevation. Values up to **34 mV/V** with chargeability footprints **over 2.5km in length**.

Line 6 looking west, the anomaly extends down below 1,200m elevation (300m+ below surface). Values of up to **33 mV/V** with chargeability footprints **over 1.3km in length**.

2026 IP RESULTS: SUNRISE & RADIO TOWER

IP LINE LOCATIONS

Line 2 looking west, the anomaly extends from 1,600m (surface elevation to below 1,200m. Values up to **24 mV/V** with chargeability footprints **over 1,400m in length**.

Line 4 looking west, the anomaly extends from 1,900m elevation to below 1,500m. Values up to **43 mV/V** with chargeability footprints **over 1,350m in length**.

2026 DMCU GEOPHYSICAL + 2025 SAMPLING RESULTS

PROPOSED DRILLING UP TO 9,000M

- Up to 9,000m drill program spread across Sunrise, Smart Creek and Radio Tower targets
- Permits in progress
- **Priority drilling:** Smart Creek PCD and Sunrise Mine

SMART CREEK LANDS & ACCESS

TARGET MINERALIZATION STYLES

RIO TINTO EXPLORATION AGREEMENT

- Domestic acquires an undivided interest of up to 60% in the Property from Kennecott pursuant to the terms of the Kennecott Agreement (see table below).
- Rio Tinto has a right to claw-back 20%, leaving Domestic with a 40% interest after claw-back.

Exploration Expenditures

Date	Year(s)	Cash in Ground (USD)	Notes
Sept, 2025	1 st 12 Months	\$ 350,000	Mapping/Sampling/Geophysical Reprocessing -summer field program
June 2026	Year 2	\$ 1,650,000	2000m drilling, 3-5 Holes best target
June 2027	Year 3	\$ 1,000,000	Success driven drilling advancement
June 2028	Year 4	\$ 1,000,000	Success driven drilling advancement
June 2029	Year 5	\$ 1,000,000	Success driven drilling advancement

Total: \$5,000,000

MANAGEMENT & ADVISORY

Gordon Neal – President & CEO

Gordon Neal started as one of the founding members of MAG Silver Corp. before moving on to serve as the VP Corporate Development for Silvercorp Metals. Mr. Neal subsequently took the role of President of New Pacific Metals and is currently CEO of Domestic Metals. Mr. Neal has raised more than \$750M in the resource sector and serves on multiple metals and mining company boards.

Peter Megaw, PhD PGeo – Technical Advisor

Dr. Megaw has a Ph.D. in geology from the University of Arizona and more than 30 years of relevant experience focused on silver and gold exploration in Mexico. He is a certified Professional Geologist by the American Institute of Professional Geologists and an Arizona Registered Geologist. Dr. Megaw has been instrumental in a number of mineral discoveries in Mexico including new ore bodies at existing mines, Excellon Resources' Platosa Mine, and MAG Silver's Juanicipio and Cinco de Mayo properties; discoveries for which he was given PDAC's 2016 Thayer Lindsley Award. Peter is also a Director of New Pacific Metals, a Canadian exploration and development company with precious metal projects in Bolivia

Stuart Ross – CFO

Mr. Ross has had a distinguished career as a senior officer and director of several public companies, including companies listed on the NASDAQ and TSXV. His sector experience includes mining, beverage production and distribution, medical services, gaming and merchant banking.

Dan MacNeil, MSc PGeo – Technical Advisor

Copper and gold specialist with 25+ years of experience in North America, South America, Eastern Europe and Scandinavia. Significant contributions to gold discoveries and resource development at Eskay Creek, Donlin Creek and Round Mountain USA.

Alan Wainwright, PhD PGeo – Technical Advisor

Copper and gold specialist with 25+ years of mineral exploration and research experience in North America, South America, Europe and Asia. PhD completed at Oyu Tolgoi (Ivanhoe Mines; Mongolia), and discovery team member of 5 Moz Au at Coffee (Kaminak; Yukon).

BOARD OF DIRECTORS

Patricio Varas – Chairman

Former CEO of Western Potash, and executive management with Far West Mining (Santo Domingo Sur). Also involved in discovery of the Diavik Diamond Mine.

Henk van Alphen – Director

Mr. van Alphen has had a long and successful career building exceptional value for shareholders. He has been directly responsible for raising \$200 million in the last 10 years and has been closely associated in financing an additional \$800 million.

Jon Sherron – Director

Jon Sherron brings over 20 years of senior management experience, with a strong focus on corporate governance, business strategy, and operational excellence. Based in Vancouver, BC, he currently serves on the boards of several public and private companies, offering valuable insights into governance, risk management, and strategic growth. Jon has been a Director of Domestic Metals since 2016, where he plays a key role in providing strategic guidance and governance oversight. He holds a Bachelor of Science from Montana State University.

David Reid – Director

David Reid, LL.B., is a senior partner and Global Co-Chair of Mining with DLA Piper (Canada) LLP with over 30 years of experience in mining and securities law, including over \$2 billion in corporate finance and M&A transactions since 2011. Mr. Reid is recognized by Lexpert as a Leading Canadian Lawyer in Global Mining, The Legal 500 Canada (Energy-Mining-Corporate-M&A), and Best Lawyers in Canada in the areas of mining, natural resources law and securities law. David led a team in connection with a transaction awarded Mining Deal of the Year by Canadian Dealmakers in 2012 and has served on the board of several TSX, NYSE and TSX.V resource companies, including Far West Mining Ltd. (acquired in 2011 by Capstone Mining Corp. in a \$1.1 billion M&A transaction).

Gordon Neal – Director

Gordon Neal started as one of the founding members of MAG Silver Corp. before moving on to serve as the VP Corporate Development for Silvercorp Metals. Mr. Neal subsequently took the role of President of New Pacific Metals and is currently Domestic Metals. Mr. Neal has raised more than \$750M in the resource sector and serves on multiple metals and mining company boards.

USA GOVERNMENT MANDATES

Developing American Copper Assets Under 3 Bi-Partisan Executive Orders

Domestic Metals is operating in the **right place, during the right time.**

1. Trump Administration 1.0 (2017–2021)

Executive Order announced to identify critical minerals and develop a federal strategy to reduce reliance on foreign sources.

2. Biden Administration (2021–2025)

Over \$120 billion in investments focused on battery and critical mineral supply chains, aiming to reduce dependence on foreign sources.

3. Trump Administration 2.0 (2025–Present)

Invoked the Defense Production Act to increase domestic production of critical minerals, along with several executive orders focused on energy and mineral development.

4. US Forest Service (Present)

Typical permitting approval timeline ~4–6 years in AZ/NV/NM, but Montana approval ~4–6 months.

Thank You.
